

# Ajouter et sélectionner les permissions dans Azure

## Ajouter les permissions

The screenshot shows the Azure portal interface for managing API permissions. The left sidebar contains a navigation menu with 'API permissions' highlighted. The main content area shows the 'Configured permissions' section for the application 'xLMS v4'. A table lists the permissions, with one permission 'User.Read' under the 'Microsoft Graph' API. A red box highlights the 'Add a permission' button, and another red box highlights the 'API permissions' menu item. A notification banner at the top explains the 'Admin consent required' column.

| API / Permissions name | Type      | Description                   | Admin consent req... | Status |
|------------------------|-----------|-------------------------------|----------------------|--------|
| Microsoft Graph (1)    |           |                               |                      |        |
| User.Read              | Delegated | Sign in and read user profile | No                   | ...    |

1/ Cliquez sur API permissions

2/ Puis sur Add a permission

## Sélectionner les permissions

- 1/ Cliquez sur l'encadré Microsoft Graph
- 2/ Cliquez sur l'encadré Application permission
- 3/ Écrivez « CALENDAR » dans la zone de recherche
- 4/ Déroulez la liste
- 5/ Sélectionnez Calendars.ReadWrite
- 6/ Cliquez sur Add permission
